

TCP

TITLE CORE PROTOCOL

A CLEAR PATH TO OWNERSHIP

Title Core Protocol

Our mission is to unlock a seamless home buying/selling experience for everyone- and more.

Real Estate Asset Transactions Today

Real estate is the largest asset class and it is also the most slow moving asset class

Transactions take days if not months

The biggest hurdle is when dealing property's titles

Titles often are not 'clean' and it delays real estate transactions by weeks

Title Core Protocol API

Allows for speed and safety

All documentation of properties will be on the blockchain

Facilitates future real estate transactions

It establishes legal data entry standards

It also allows for the creation of a bigger economy on web 3

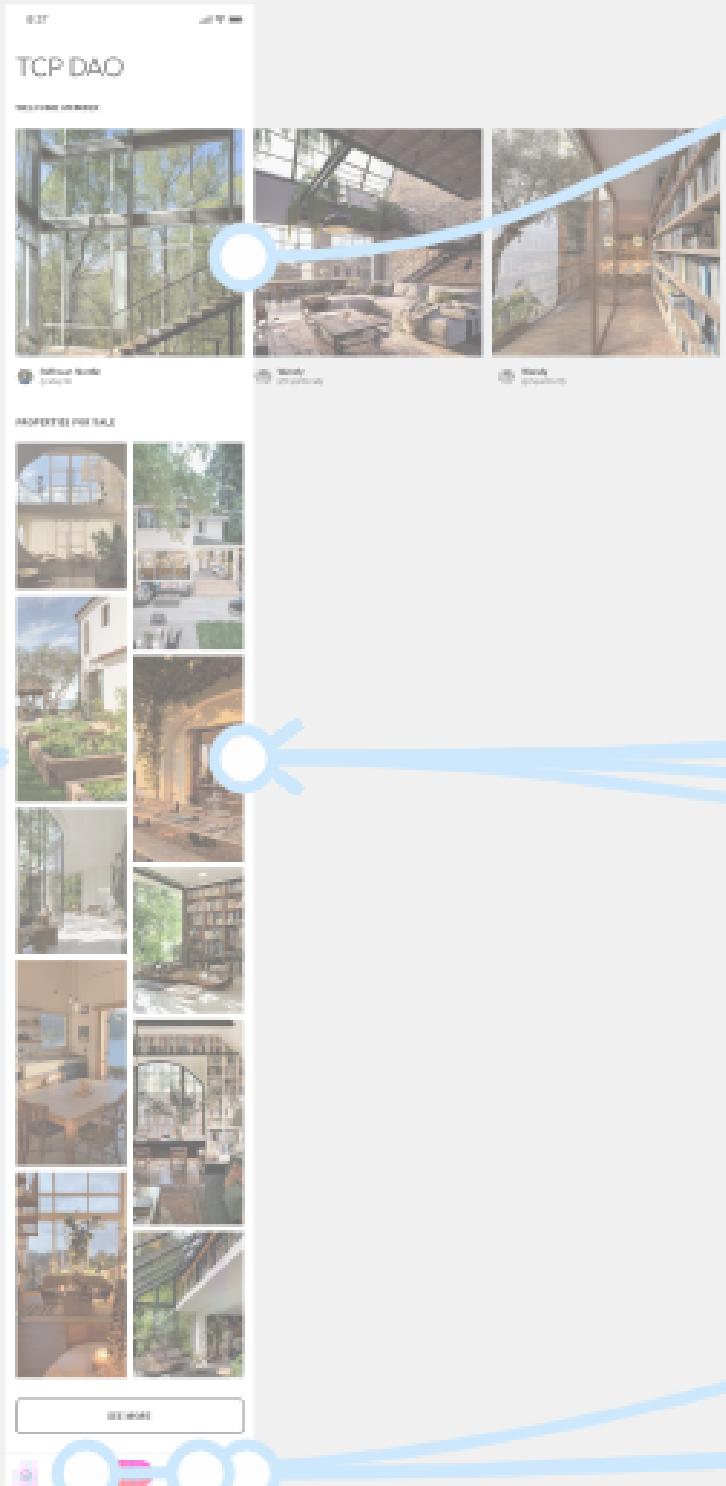

Title Holders DAO

With secure and efficient data storage from Filecoin a new Data DAO can be created

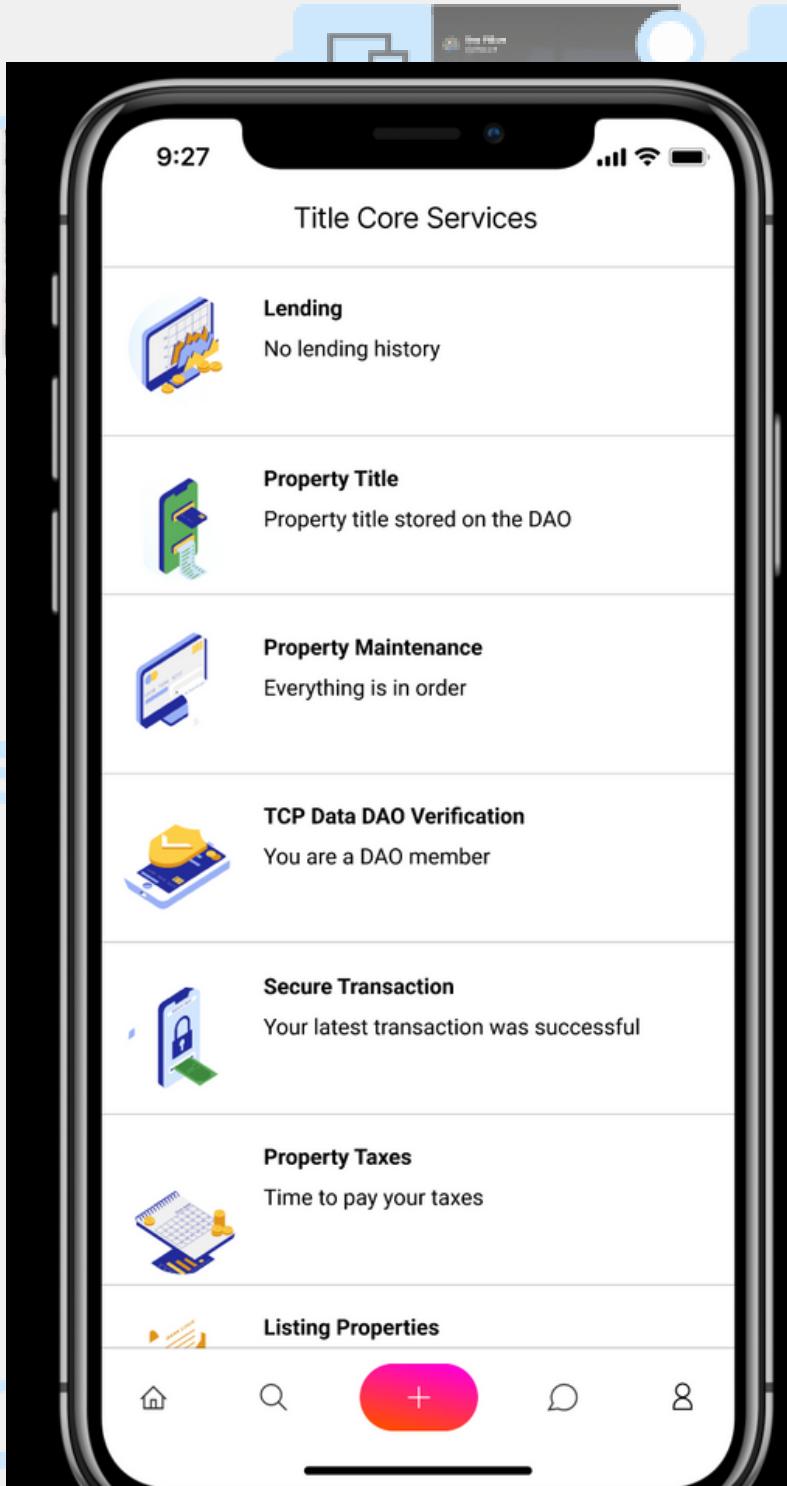

Transactions can be made with members and non-members of the DAO

Lending, Financing and Leasing will be easier and all on the blockchain

Financing and
Lending
Opportunities
with TCP DAO

Title Holders DAO

Reliability of Integration

Security and legitimacy leads to trust and greater conversion rates

Filecoin for Data Storage

TCP's source of knowledge and pillar will be Filecoin and creation of Data DAOs

Financing and Lending Opportunities

Hosting and managing the transaction of the largest asset class will create an infrastructure for lending and financing at a massive scale

Financing and Lending Opportunities for the Future

The ecosystem of storing the most influential information for our economy will open up new opportunities for investments.

Making real estate transactions fast, easy, and secure with the help of Filecoin is the future of REI.
